

ANDREW E. PIERCE

Environmental Scientist, Third-Party Inspector and CAD/GIS/GPS Tech

Professional Profile Mr. Pierce has more than eighteen years of professional experience working in the environmental field. After completing his education, he joined Moyse Environmental Services and the environmental consulting field. The professional services that he provides include GPS mapping of protected resources and site features; off-site GIS mapping; CAD production of site plans; septic system layout and drafting; wetland/protected resource identification; vernal pool assessments and third-party inspections (3PI). He has extensive training in all of the services noted above.

The diversity of projects Andy has been involved with includes solar arrays; subdivisions; industrial parks; shopping malls; schools; utility transmission lines; wind and solar power development; airports; transfer stations; and land disposal of wastes and water/wastewater facilities. His primary duties include CAD/GIS; GPS mapping and processing; third-party inspections and permit compliance monitoring; site investigations/recons for protected resources; and assisting with project reports, permit applications and environmental site assessments.

Education A.S., Computer Aided Drafting & Design
Eastern Maine Community College (2008)

Certifications and Licenses Maine DEP - Certified in Erosion & Sediment Control #1025
EMBSO Licensed Soccer Official

Special Training Erosion Control and Third-Party Inspections
Permit Compliance Monitoring
Computer Aided Drafting (CAD)
Geographical Information Systems (GIS)
Wetland Identification and Mapping
Vernal Pool Identification and Assessments
Global Positioning Systems Use (GPS)
Site Feature Mapping

Professional Memberships MEGUG - Maine GIS User Group
Associate Member: Maine Assoc. of Site Evaluators
Maine Assoc. of Wetland Scientists
Maine Assoc. of Professional Soil Scientists
